

Based in the Seattle area, These Creatures, Inc. is a design studio focused on designing and manufacturing quality, sustainable products for the modern creature. In 2008, These Creatures, Inc. was founded by designer and craftsman Andrew Finkel (a.k.a. Frank Mansfield), whose background lies in custom furniture and retail design. Since our inception we have achieved what we believe to be the highest quality product on the market. These Creatures, Inc. provides an ergonomic and durable product for stylish animals everywhere. Our designs are sleek pieces of art that complement modern decor and showcase the animal as part of the family. We presently specialize in breed-specific hanging feeders for dogs and cats, with plans for a broader selection of breeds, free standing feeders and accessories in the near future.

Our line of wall-mounted hanging feeders is the perfect dining solution for the modern animal. By elevating the bowls off of the floor, we've created an ergonomic dining experience. Raised feeders facilitate better health for dogs by aiding in digestion and reducing back and neck pain. With sustainability in mind, our products are designed and manufactured under one roof, and waste is minimized as each product is produced to order. The longevity of our products is considered in both the construction and timeless designs, and each product is meant for a lifetime of use.

Our commitment to animals extends beyond our business. Everyone at These Creatures, Inc. is personally involved in animal rescue, and a percentage of our profits goes to the support of animal rescue organizations that make the world a better place for animals and the people who love them. Features of our wall-mounted feeders:

- Removable stainless bowls
- Fabricated out of 12-gauge steel and powder coated for durability
- Secures firmly to the wall and comes in 5 colors to choose from with, matching hardware.
- Designed and manufactured under one roof in the USA.
- Colors include: Limesicle, Coral, Parakeet, Charcoal, Pearl
